

Chance Cummings

Cybersecurity Generalist · IT Field Service Technician · Dark Fire Security Founder

Ashland City, TN | 615-693-1113 | thechancecummings@gmail.com | chancecummings.com | darkfiresecurity.com | github.com/jazzy216

PROFESSIONAL SUMMARY

IT and security professional combining enterprise endpoint/MDM experience at a major academic medical center with hands-on digital forensics work, a self-built security portfolio, and a founded cybersecurity consultancy. CompTIA A+ and Network+ certified, Security+ (SY0-701) exam scheduled, pursuing a B.S. in Cybersecurity at WGU. Strong across networking fundamentals, Windows/Linux administration, PowerShell scripting, and security tooling — skilled at translating technical risk into plain language for non-technical stakeholders. Seeking a cybersecurity generalist, SOC analyst, or digital forensics-adjacent role.

KEY QUALIFICATIONS

- CompTIA **A+** and **Network+** certified — Security+ SY0-701 exam scheduled
- Enterprise MDM at a Level 1 trauma center: Intune, ABM, VMware Horizon VDI — 100+ endpoints provisioned
- Hands-on offensive & defensive security: Nmap recon, log review, incident response workflows, MITRE ATT&CK-mapped labs
- Digital forensics practice: persistent Windows 11 forensic VM (KVM/QEMU) running FTK Imager, Autopsy, Velociraptor, Eric Zimmerman tools, and iLEAPP — six-case investigation progression completed
- Founder of Dark Fire Security — SMB cybersecurity audits, phishing simulations, risk reporting for Middle Tennessee clients
- PowerShell scripting & automation applied to real MDM, provisioning, and security workflows
- Trades background (CDL Class A, landscaping) as uncopiable credibility differentiator with blue-collar and rural clients

TECHNICAL SKILLS

Security: Incident response fundamentals, log review & analysis, Nmap recon, host enumeration, vulnerability identification, network hardening, DNS filtering, IAM, threat intel basics, risk assessment & scoring

Digital Forensics: FTK Imager, Autopsy, Velociraptor, Eric Zimmerman (EZ) tools, iLEAPP, disk/mobile artifact analysis, forensic VM builds (KVM/QEMU)

Networking: TCP/IP, DNS, DHCP, VPN, LAN/WAN, subnetting, Active Directory fundamentals

Endpoint & MDM: Microsoft Intune, Apple Business Manager (ABM), VMware Horizon VDI, Pegasus CI, ServiceNow; iOS & desktop provisioning, imaging, compliance policies, floor-specific & specialty profile deployment

OS / Systems: Windows 10/11, Linux (Ubuntu/Debian, Kali, Arch/Omarchy), macOS, iOS

Scripting & Dev: PowerShell (WPF GUI, automation), Python, Bash, HTML/CSS, JavaScript, JSON, Git/GitHub

Cloud & Data: AWS fundamentals; SQL, MySQL, PostgreSQL, SQLite

Tools & Lab: VMware, KVM/QEMU, VS Code, Chrome DevTools, Docker, Tailscale, Pi-hole, Portainer, Ollama/Open WebUI; multi-OS home lab

Compliance: HIPAA-aware device & data handling, PHI protocols, healthcare IT environment

CERTIFICATIONS & LICENSES

CompTIA A+ — Certified (valid 2024–2027)

CompTIA Network+ — Certified (March 2025)

CompTIA Security+ SY0-701 — Exam Scheduled

Google IT Support Professional Certificate — 2024 (Tech Support · Sys Admin & Infrastructure · Networking)

Intro to AWS Solutions — 2023

CDL Class A · Certified Lawn Care Pro (UTK, 2024–2026)

PROFESSIONAL EXPERIENCE

IT Field Service Technician — CTG Contractor @ Vanderbilt University Medical Center (VUMC)

Nashville, TN | March 2026 – Present

- Provisioned and deployed **100+ clinical workstations**, WOW (Workstation on Wheels) carts, and **32+ iOS devices** via Microsoft Intune and Apple Business Manager, including Radiology-specific and charge-nurse cellular configurations; managed full device lifecycle from imaging through floor-ready deployment
- Engineered **floor-specific MDM configuration profiles via Microsoft Intune**, including specialty charge-nurse iPhone cellular profiles — distinct APN configuration and policy enforcement from standard Wi-Fi-only device profiles
- Supported full floor go-lives for **two Neuro Step Down units** and **4–5 backfill moves**, coordinating device deployment, network validation, and extended on-site support through each cutover
- Collaborated cross-team to install and commission **epilepsy monitoring equipment in an EMU reading room**; supported go-live of that clinical environment
- Handled a **live network switch swap with port remapping** and ran **32-port KVM/PXE bulk imaging** (WinPE + WIM, manual OS/OU selection, no SCCM)
- Independently resolved a site visit **six other technicians had been unable to complete** — desktop swaps, rename scripting, shared drive remapping, forced updates, and Pegasus CI retire/create — using Bomgar remote support where others gave up
- Located an **untracked laptop offline since 2024** through direct staff interviews, and identified an **Active Directory group hygiene gap** in the eStar Playground VDI environment, tracing legacy app-icon persistence to un-cleaned AD group memberships
- Deployed and troubleshooted **VMware Horizon VDI** for clinical and administrative staff; managed assets in Pegasus CI and triaged tickets in ServiceNow; authored **SOP-ITS-001** iOS provisioning runbook and became informal institutional knowledge source for MDM workflows after senior technician departure
- Writing **rename and provisioning automation scripts** to cut per-device setup time; converting devices between dedicated/shared Intune group tags in place saves an estimated **20–30 min per device** versus a full interactive wipe (**~430 technician hours/year** at current device volume)
- Applied HIPAA-aware device handling throughout; identified PowerShell access on restricted “Hugs machines” and documented that layered GPO/Intune compliance controls correctly prevented privilege escalation — submitted as configuration analysis

Founder & Security Consultant — Dark Fire Security

Middle Tennessee | 2024 – Present | darkfiresecurity.com

- Founded cybersecurity consultancy serving small businesses, farms, and tradespeople across Middle Tennessee; built brand, website, and service offerings end to end
- Deployed **Wave 1 Assessment Toolkit**: five PowerShell WPF GUI tools (Password Audit Scanner, WiFi Security Checker, USB Device History Viewer, Open Ports Snapshot, Phishing Email Header Analyzer) — USB-portable for on-site SMB assessments
- Built and launched **PhishGuard** phishing simulation trainer, **SUBFIND** passive DNS enumerator, EXIF metadata tool, QR analysis toolkit, and steganography detector — all live
- Clients include: Wade King Construction, Sunshine Electric LLC, Beyond Drain Solutions, Defiant Machine Works, A1 Pawn Shop

Sales Assistant — A1 Pawn

Springfield, TN | Present

- Handle high-volume in-person sales, pawns, loans, and financial transactions with focus on data accuracy and customer service
- Own the shop's full online and social-media presence; built and maintain a custom pawnshop analytics dashboard for sales and inventory insight
- Contributed to the shop being voted “Best Pawn Shop” in the county for approximately four consecutive years

Owner / Operator — Double C Solutions, LLC

Ashland City, TN | 2023 – 2024

- Founded and ran a service business — scheduling, invoicing, client communication, and company web/email/IT needs — while attending school full-time

- Built and deployed client websites; deployment pipeline: Claude → GitHub → Vercel

Logistics & Operations — UPS (Feeder Operator / CDL) & Jumpp Logistics (Contractor)

Nashville, TN | 2021 – 2024

- Operated heavy commercial vehicles with an impeccable safety record; coordinated with hub operations to meet strict deadlines in high-pressure environments
- Managed complex delivery routes using logistics/mobile apps for tracking and 100% on-time fulfillment

Earlier Experience: Montgomery Farmers Co-Op & Riley Brothers Farms

2015 – 2021

Developed mechanical aptitude, inventory management, financing/sales, and strong work ethic through power equipment sales, assembly, and field operations.

SECURITY PROJECTS & PORTFOLIO

SENTINEL — Designed an automated security-monitoring and lightweight pentesting platform for SMBs (React / Next.js / Supabase / Stripe / Gemini AI)

FIELD CRAFT — SOC study platform with spaced repetition — 53 flashcards, 14 triage scenarios

DFIR Home Lab — Persistent Windows 11 forensic VM (KVM/QEMU) on a hardened Arch/Hyprrland (Omarchy) Linux host with Tailscale-based remote access; working tool stack of FTK Imager, Autopsy, Velociraptor, Eric Zimmerman tools, and iLEAPP — six-case forensic investigation progression completed

Zero-Trust Proximity Protocol (ZTPP) — Original security research on LAN-discovery exposure, packaged as an RFC-style spec, whitepaper, and interactive demo

Dark Fire Assessment Toolkit — 5 PowerShell WPF GUI tools, USB-portable for on-site SMB security assessments (Wave 1 complete; Wave 2 in progress)

PhishGuard — Interactive phishing simulation trainer with active hunt-the-tells mechanic — live on darkfiresecurity.com

SUBFIND — Passive DNS subdomain enumerator — live on darkfiresecurity.com

DarkChef — CyberChef-style tool supporting encoding, decoding, and encryption/transformation pipelines

APEX INTEL / DARKFIRE INTEL — Threat intelligence dashboard and cyber news aggregator; NetProbe public IP inspector

Security Web Apps — Small Business Cyber Risk Intake & Scoring app, Cyber Risk Report generator, Phishing Awareness & Detection educational site — all live on chancecummmings.com

Ethical Hacking Labs — MITRE ATT&CK-mapped labs: Nmap recon, host enumeration, service fingerprinting, exploitation, post-exploitation, and reporting; multi-OS home lab with Pi-hole, Docker, Tailscale

EDUCATION

B.S. in Cybersecurity — Western Governors University (WGU)

In Progress

Agriculture Business Coursework — Austin Peay State University | 2015–2019

Languages: English (Native) · Spanish (Basic Conversational)
